- Developed and maintained enterprise web applications using Java, JavaScript, HTML, and CSS.
- Designed responsive user interfaces and implemented asynchronous behavior using AJAX and Java technologies.
- Documented RESTful API integrations and other backend processes using industry best practices.
- Built and maintained dynamic, high-performance websites and applications using Java and related frameworks.
- Utilized various Java frameworks (such as Spring Boot, Hibernate) to improve scalability, modularity, and maintainability.
- Collaborated with cross-functional teams to design and implement scalable solutions for complex business requirements.

### SKILL

- Mysql/json
- Ajax/jquery
- Eclipse,servlet,jwt
- API
- Springboot
- Bootstrap
- React UI only
- BackEnd and Database Skills
- Responsive Web Design
- Expert java Knowledge
- FrontEnd Skills: HTML, CSS, Javascript
- Core Java, IntelliJ

### PROJECTS IN JAVA

#### SCHOOL MANAGEMENT SYSTEM (SMS)

A School Management System is a software solution designed to help educational institutions manage core administrative and academic processes such as student enrollment, attendance, exams, grades, timetable scheduling, and fee collection.

#### MALL CRM (CUSTOMER RELATIONSHIP MANAGEMENT)

A Mall Customer Relationship Management (CRM) System is a software solution designed to help shopping malls efficiently manage core customer engagement and operational processes. It enables malls to handle visitor registration, store promotions, loyalty programs, footfall tracking, event scheduling, customer feedback, and purchase history analysis — all from a unified platform.

### LANGUAGES

- Tamil (Fluent)
- English (Intermediate)
